

Do you recognize this?

Your back hurts, the binders lying on the floor and oversight you have no more..
Where to go with the laptop, binder or measuring instrument?

When working on a control panel you don't have a workplace to work ingenious.

Anyway, sitting on an upturned box or cable reel, with the laptop on your knee and the binder for your feet, you will manage it for so far.

Imagine, there is a solution that solves all these problems at once, you can take your workplace with you and situation dependent Customizing.

Working on location is not as comfortable as at the office where a desk is height adjustable, and then I will not talk about the adjustability of the seats (complete with sitting instruction).

Such a "bad" work situation can be soon to the past with the "LapTassist" a hanging mobile laptop table with document holder.

The LapTassist can be hung on the in- or outside of an instrument or control panel door, adjusted to the right height, depending on whether you wish to work in standing or sitting position.

Technical data:

Weight:	around 3,5 kg
Size (folded):	80 x 50 x 8 cm
Load capacity work top:	10 kg
Height adjustment:	12 steps of 5 cm

Advantages:

- Comfortable posture during work (which may result in lower absenteeism at work).
- Work top big enough to hold a laptop and a mouse.
- The document holder provides the possibility of recording data or consulting a reference book within the same visual field.
- No cords lying around to trip over, or worse making your laptop fall.
